**AUXILIARY FUEL DISPENSING SYSTEM****ABSTRACT OF THE DISCLOSURE**

An auxiliary fuel dispensing system includes an auxiliary fuel pump disposed in a vehicle fuel tank. An auxiliary dispensing tube is connected at one end to the auxiliary fuel pump and at another end to an auxiliary dispensing location on the vehicle. One end of a fuel delivery hose is releasably connected to the end of the tube at the auxiliary dispensing location. Another end of the hose has a dispensing nozzle attached thereto. A means for selectively activating the pump is operable to pump fuel from the fuel tank, through the tube and the hose, and out the nozzle.
